Report Number.....: 105233308CRT-001

Signed Quote Number.....: Qu-01305820

PO Number...... Anchor 049

Name of Testing Laboratory

Preparing the Report Intertek Testing Services NA Inc.

Test Specification:

Standard.....: ANSI/ASSP Z359.18-2017

Date(s) of Testing.....: 11/1/2022-11/14/2022

Product Description:

Product Type: Type T Anchor

Brand Name: AJUSTCO

Model Number(s): Anchor Thread AT500DBK & AT500ANK

Date(s) Samples Received: 10/12/2022, 10/26/2022

SECTION 1

SUMMARY OF TESTING

TESTS COMPLETED	ANSI/ASSP Z359.18-2017 CLAUSE	STATUS
Design Requirements	3	PASS
Dynamic Strength Test- Type T	4.2.2.1.4	PASS
Residual Dynamic Strength- Type T	4.2.3.1	PASS
Static Strength Test (Per loading direction)	4.2.1.1	PASS
Serviceability Static Load Test- Type T	4.2.4.2	PASS
Marking And Instructions	5	PASS

Report No.: 105233308CRT-001

SECTION 2

This test report concludes the work anticipated in the testing phase of your project. If there are any questions regarding this report please contact the undersigned at 607-753-6711.

SECTION					
(TEST)	REQUIREMENT RESULTS	COMPLIANCE			
5	Marking and Instruction Requirements	PASS			
	The following marking shall appear in English on the label, marking or tag that is designed to last for the lifetime of the anchorage connector and is permanently affixed to the anchorage connector: A) The manufacture's name or mark	PASS			
	B) The year of manufacture	PASS			
	C) Model number	PASS			
5.1.1	D) "ANSI Z359.18 and the type	PASS			
	E) Marking to indicate restrictions on directions of loading, if applicable	PASS			
	F) Where specified by the manufacturer, the working load.	PASS			
	G) An individual serial number or a lot or batch number that provides traceability				
	H) Minimum breaking strength followed by "MBS"	PASS			
5.1.2	As required for the specific anchorage connector, the following marking shall appear in English on a label, marking or tag that is designed to last for the lifetime of the anchorage connector and is permanently affixed to the anchorage connector.	PASS			
5.1.2.1	Anchorage connector that incorporates a closed loop not intended for connection, but may be mistake for a connection point shall be permanently labeled with a warning not to connect a fall protection system or suspended component to the closed loop when used in a cinching application.	PASS			
5.1.2.3	The minimum service temperature the anchorage connector according to 3.1.3.2	PASS			
5.1.2.4	For tripods and davit systems, the maximum number of users permitted on the system.	PASS			
5.2	Instruction Requirements	PASS			
5.2.1	Instruction and information shall be provided in English with each anchorage connector.	PASS			
5.2.1.1	A) A statement that the anchorage connector has been tested in compliance with the requirements of ANSI/ASSE Z359.7, and caution that the ANSI compliance and testing covers only the hardware and does not extend to the anchorage and substrate w=to which the anchorage connector is attached. B) Specifications for appropriate anchorage(s) to which the anchorage connector can be attached, including instructions on how to proceed when the user is unable to determine whether the anchorage meets the manufactures specification and instructions that the anchorage connector shall only be connected to anchorages that: i) Can withstand 5,000 pounds without failure, except that lower strengths are acceptable when permitted by applicable legislation ii) Are certified by a professional engineer as having the required strength for fall arrest or travel restraint, as applicable iii) The manufacturer may provide specifications of allowable materials including the minim shapes, sizes and geometry of structural elements to which the anchors connector may be fastened C) The manufacturer shall clearly label the minimum service temperature for the anchorage connector according to 3.1.3.2. D) The manufacturer shall supply complete specifications for fasteners The anchorage connector type	PASS
